

# Fastening Systems Make It Possible

## Fastening Systems. The Benefits:

- High speed, easy to install systems can reduce production time by 75%
- Strong, vibration resistant systems use less fasteners-saving weight and cost
- Maintenance free, quality long-life joints result in lower total costs-a guaranteed return on investment!

### 1. Magna-Bulb

- One-piece structural self-locking, bulbing fastener with 360° circle lock
  - High shear and tensile strength
  - High resistance to vibration and loosening
  - Large blind side footprint, ideal for thin sheet metal
  - Flush pin break
  - TIR approved
- Trailer corner sections, aluminium floors and panels, roof-to-roof bows. Repairs out-of-round holes

### 2. HuckLok

- One piece structural self-locking bulbing fastener
  - Unique double lock system for maximum joint integrity and fatigue life
  - High shear and tensile strength
  - Wide grip range for reduced inventory
  - Flush pin break
- Trailer roof applications, corner sections curtain rails and refrigerated trailer exterior frames

### 3. BOM

- Structural high strength blind steel fastener
  - Excellent pull-together properties, high clamping force
- Trailer heavy-duty joints, corner sections, door locking brackets, mounting brackets

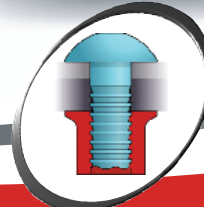

### 4. FloorTight

- Superior performance over conventional flooring fasteners
  - Blind insulation, high shear, clamp and tensile strength
  - Head countersinks itself flush in the floor panels
- Trailer floors

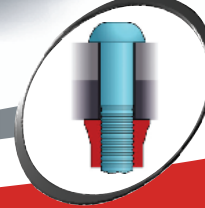

### 5. Magna-Tite

- High strength structural blind fastener with advanced polymer watertight seal
  - Wide grip range for reduced inventory
  - Large blind-side footprint for strong, vibration resistant joints
  - Ideal for thin sheet materials and composites
  - Flush pin break
  - TIR approved
- Trailer roofs and load-locking systems

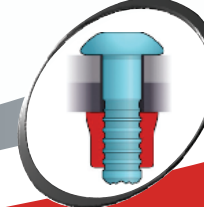

### 6. Magna-Grip

- Consistent, high clamp force two piece fastener
  - Good vibration resistance
  - Extensive grip range enables inventory reduction
  - Flush pinbreak across whole grip range
  - TIR approved
- Trailer corner sections, aluminium floors & panels, roof-to-roof bows. Repairs out-of-round holes

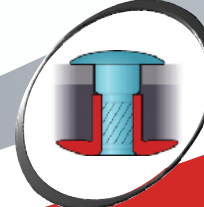

### 7. C50L

- Heavy two piece fastener
  - Meets strength performance of grade 8.8
  - Resistant to vibratory loosening
  - Visual inspection confirms joint integrity
- Trailer chassis

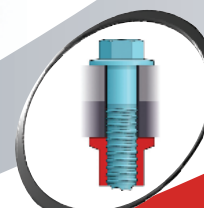

### 8. C6L

- High tensile strength and vibration resistant two piece fastener
  - Standard 6 locking grooves offering wider grip range than most competitor fasteners
- Truck bumper attachments, radiator mountings

### 9. Hucktainer Plus

- Two piece fastener specially for joining GRP board to metal frame
  - Does not crush or damage GRP board
  - Wide grip range
  - Low profile, gives neat tamper-proof finish
  - Seal prevents moisture ingress
  - TIR approved
- Trailer sides

### 10. Huck-Fit

- Heavy duty two piece fastener with unique lock groover form.
  - Fit-up facilities with pre-alignment
  - High resistance to vibratory loosening
  - Can be removed with conventional wrench
  - High clamping force meets strength performance of grade 10.9
- Trailer chassis, truck cross assembly, fifth wheel, suspensions

## Blind Fasteners

## Lockbolts
